EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Remus Fetea on 3/15/06.

The application has been amended as follows:

In The Claims

Claim 1 has been canceled.

Reasons For The Above Change

The above change is necessary for advanced prosecution of the application and to place the application in condition for allowance.

REASONS FOR ALLOWANCE

2. Claims 2-16 are allowed.

Claim 2 is rewritten in independent form including all the limitation of the base claim. Thus, claim 2 is allowed because the prior art of record fails to disclose or suggest the limitation, in combination with other limitations, "the driver is capable of further applying the gate voltage as a third gate voltage to the transistor, wherein the third gate voltage being higher than the first gate voltage and lower than the second gate voltage, and wherein the timing controller controls the driver so that application of the third gate voltage follows application of the first gate voltage,

and application of the second gate voltage follows a recovery current of a main current of the transistor within a mirror effect time of the transistor” as called in the claim.

Claims 3-9 are allowed because they depend on claim 2.

Claim 10, as amended, is allowed because applicant’s argument is found persuasive, i.e., the prior art of record fails to disclose or suggest, in combination with other limitations, the driver including first, second and third drive circuits, wherein a gate voltage applied by the third drive circuit being determined based on a main current of the transistor, and wherein the gate voltage is different from the first and second gate voltages as recited in the claim.

Claims 11-13, 15 and 16 are allowed because they depend on claim 10.

Claim 14 is rewritten in independent form including all the limitation of the base claim. Thus, claim 14 is allowed because the prior art of record fails to disclose or suggest, in combination with other limitations, “the voltage supply unit calculates an average of the main current obtained from a plurality of drive periods of the transistor to generate the gate voltage on the basis of the average of the main current to be applied in a subsequent drive period of the transistor”.
